Landscape Service

We are well equipped with material and trained men to give our usual care and attention to your planting requirements.

Phone LOnG Branch 6-2587 for an appointment so that we may call on you to make suggestions.

When plans are necessary a moderate charge will be made, which will be credited to the customer's account when the order is placed.

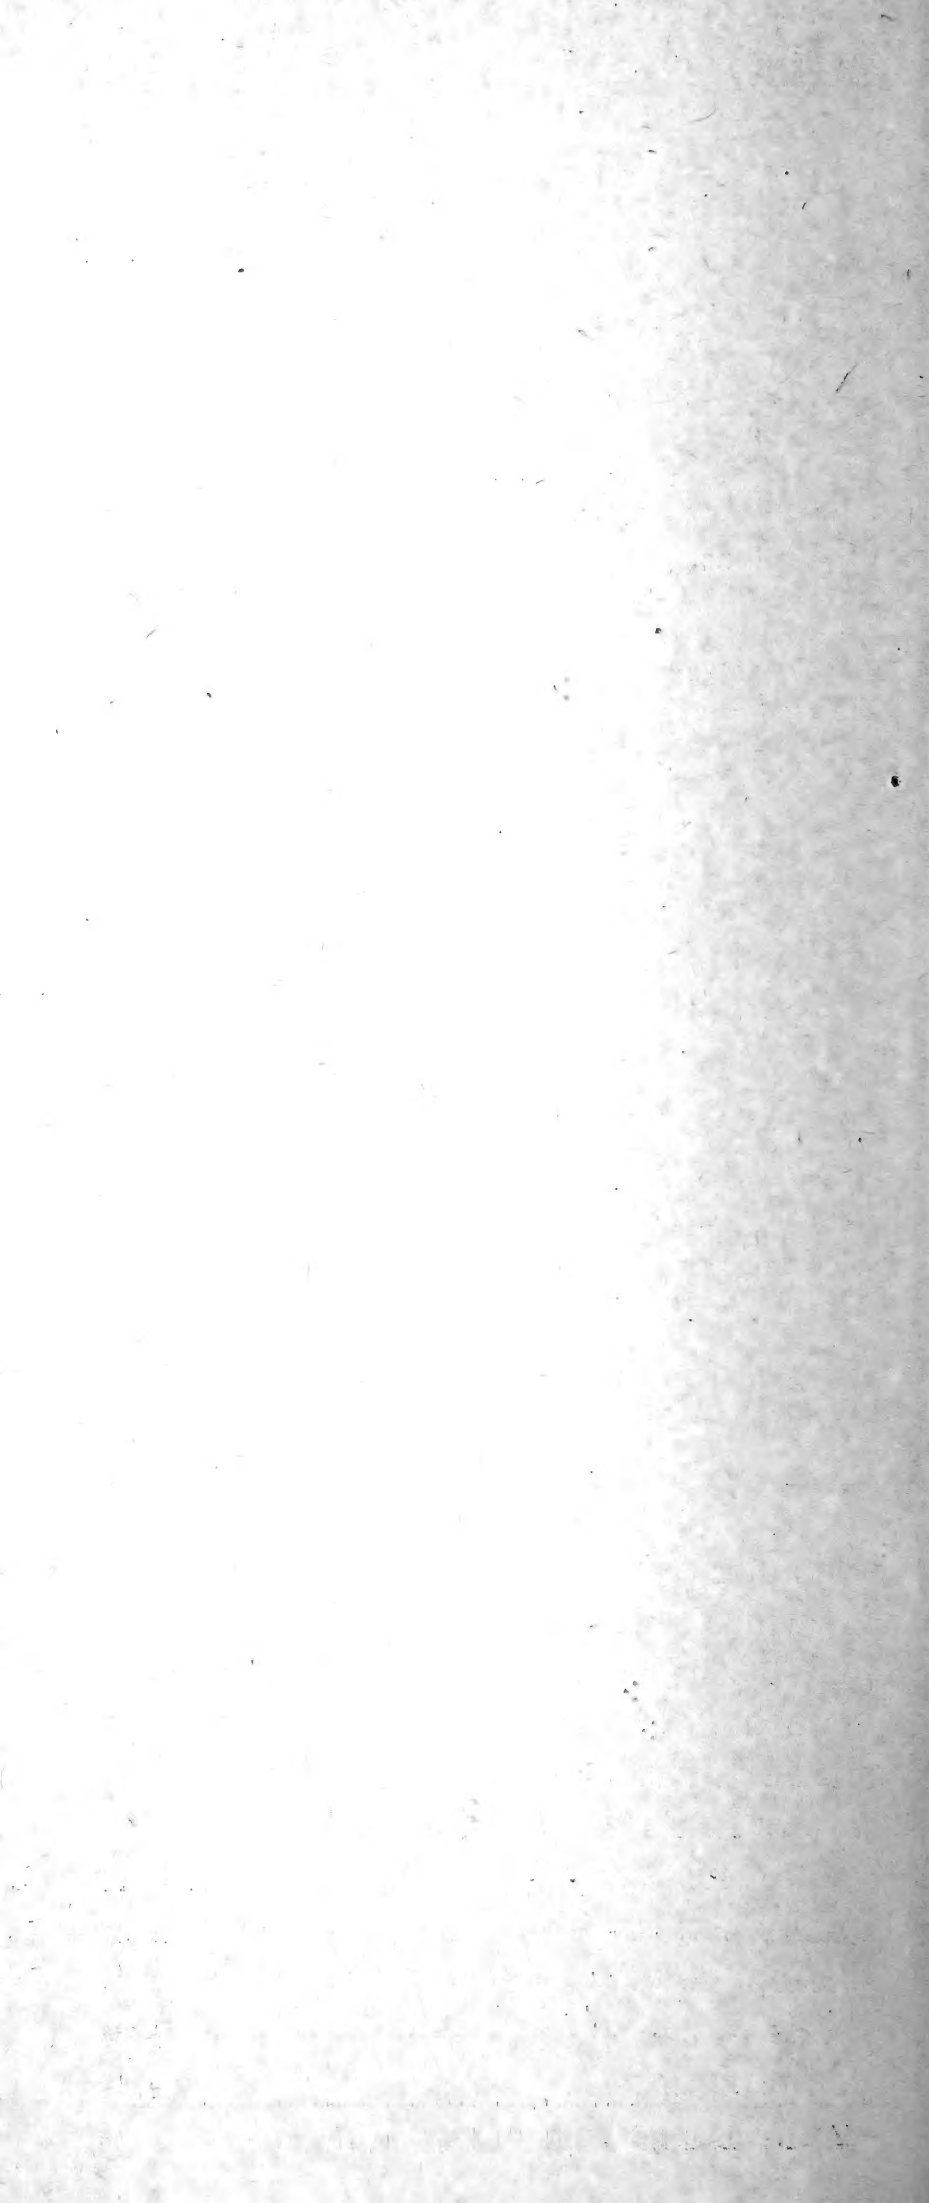

Plant Market

We have a plant market near our office, primarily for customers who wish to buy plants to take home and plant themselves.

This market will be stocked with most varieties listed in the catalog ready to be put right in your car. All plants will be labeled and priced. You will be able to make your selection without waiting.

IMPORTANT!

Care of Newly Planted Trees, Shrubs, Evergreens.

To get the best results from your newly planted trees, shrubs, evergreens and perennials it is very necessary to water often and thoroughly in dry weather.

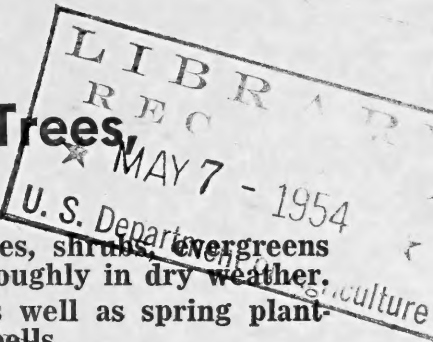

All new plantings, this includes last fall plantings as well as spring plantings, should be watered at least twice a week during dry spells.

Deep rooted plants such as trees, shrubs and evergreens should be flooded at each individual root with a hose without a nozzle. Make a collar around each plant with the soil to hold the water at the root of the plant. Cultivate the soil around all plantings a day or so after watering. Do not let the soil bake after watering.

WARNING. If the above directions are not carried out regularly, there is great Danger of your plants dying.

Water is a very cheap Insurance for the success of your plants which we sincerely hope will give you much pleasure and satisfaction this coming season.
